Product Spec

Model Name	SB-CST32T	Container Load (20'/40')	48 / 106
Capacity	32 Bays	LED indicator - Dual color	32
Supported Devices	Tablets	External Power outlet	AC 100~120V, 50/60Hz, 4A AC 220~240V, 50/60Hz, 4A
Max Tablet Size	350 x 290 x 21 mm	Power Specification	Input:AC 100~120V, 50/60Hz AC 220~240V, 50/60Hz DC:5V, 2.4A for each USB port
Dim. with Packaging	860 x 590 x 1120 mm	N.W. / G.W.	65kgs / 77kgs
Optional Accessories	1. FAN (DC 12V / 0.6A) 2. Combination Padlock		

Package Contents

Package Contents

- Cart x 1
- Power Cable x 1
- Sync Cable x 1
- User manual x 1
- Window Key x 2

Tablet Cable for Charging and Syncing

1. Before assembling cable management, please make sure the power cable is disconnected from the wall. Unlock the trolley and open the doors.

2. Line a USB connector cable along number 1 to 16 (around 175mm) on the drawer. Route the USB connector cable through the cable clips on the top of drawer to the back of the drawer. Leave the USB head on the back of the drawer.

3. Repeat USB cabling steps for the rest of the USB connector cables.

4. Before setting up the cable management system, please make sure the power cable is disconnected from the wall socket. Unlock the trolley and open the doors.

5. Put tablets into the drawers. Connect the USB charging cables to the tablets.

Charging Set-Up

The power cable is main source of delivering power to the charging trolley, which can be controlled with the ON/OFF-switch. When plugged in and switched ON, the trolley will start charging.

NOTE: the device will not charge and sync at the same time.

LED indicator :

1 light for each device on the top of trolley, sequence numbered LEDs corresponding to each tablet in the channels.

Color Green = Fully Charged.

Color Red = Charging in progress.

Color Green/Red Flash = Sync in process.

Other Feature

Service Only

Only for use by technical maintenance staff

Charge board software update

Tablet Sync Set-Up

iTunes Setup

Here are a few settings that should be changed in iTunes to make it work best with the trolley and iPads.

1. Open the iTunes application on your master laptop. Select Preferences from the Edit menu. On the General pane, uncheck "Check for new software updates automatically". This keeps the automatic update process from interfering with the syncing process. You can still check for iOS updates by manually clicking on the Check for Updates button on the individual iPad screens. For more on iOS updates, see the iOS Update section below.

2. Next, click on the Device icon. Make sure none of the options are selected. The screen should look like this when complete. Click OK to save your changes.

3. Prepare your iTunes library by downloading the Apps, Books, Music, etc. that you intend to copy to your iPads.

iPad Set-up

Before starting the syncing process, each individual iPad needs to be configured to work with iTunes and the Qubic correctly. This can be done by plugging each device into the master syncing laptop one unit at a time, or you can plug one unit in at a time within Qubic slot. To speed up the syncing process when syncing multiple devices, Apple suggests disabling automatic backups. This can be accomplished using Apple Terminal or a third party software.

1. Set-up your master Laptop. Plug the power cord into the auxiliary outlet and the USB cable into the auxiliary USB plug. Plug the Qubic power cord into a wall outlet.
2. Select one iPad. We recommend setting your screen brightness at half level or less as the screen does stay on during syncing process. Go to Settings and select Brightness. Click Auto-Brightness so it turns off. Slide the brightness slide to left so it is positioned halfway between dim and bright.
3. Plug iPad connector into the USB slot.

NOTE: if connected to a PC, during this time drivers will be loading, so wait until you get the message that your device is ready to use before proceeding to step 4.

4. Open iTunes if it does not open automatically. Select your iPad device from the Device table on the left side of the screen.
5. The iPad registration screen will come up. Follow the prompts to log in or create an Apple ID and name your iPad.
6. Click on the Summary tab. Select "Open iTunes when this iPad is connected" and "Sync only checked songs and videos". Verify "Manually manage music and videos" is not selected (this function would require you to drag and drop your selections in each iPad).

7. Click on each of the tabs at the top (Apps, Music, Movies, TV shows, Books, Photos) and select which type of files you will want to sync on this device. Click the Sync or Apply button.

8. Repeat Step 2 – 7 with each iPad that will be used in this product.

7. Click on each of the tabs at the top (Apps, Music, Movies, TV shows, Books, Photos) and select which type of files you will want to sync on this device. Click the Sync or Apply button.
8. Repeat Steps 2 – 7 with each iPad that will be used in this trolley.

Ready to Sync

1. When all the iPad devices have been configured, you are ready to charge and sync your tablets. Place each iPad in a slot in the trolley. Plug each device in using the 30-pin Apple connector connectors. Plug the trolley into a wall outlet.
2. If the iPad devices are new, they should be fully charged before attempting to sync.
3. When ready to sync, connect one end of the USB cable into the USB port near the auxiliary outlet and the other into a USB 2.0 port on your Mac or PC.
4. iTunes will open and syncing will start automatically. Each iPad will be listed in iTunes under the Device list on the left hand side of the screen. You could review the sync status from master PC.

NOTE: Please keep in mind that identifying the devices and syncing will take time, so please be patient. The time is dependent on the number of iPads being synced and the amount of data being transferred. It can range from a few minutes to hours on 32 devices depends on different content. Please do not stop the process once it has been started.

5. When syncing is complete, the Eject symbol will appear next to each device. At this time it is safe to eject the device by clicking on the Eject symbol or closing iTunes.
6. When syncing is complete, unplug the USB Cable from your PC so charging can begin. Charging will not occur while the USB Cable is plugged into the master laptop.

iOS Updates

Due to the functionality of the iTunes software, iOS updates can not be done across the whole fleet of iPads at one time. This will need to be completed one unit at a time. It can still be done with the units plugged into the trolley. To update iOS on each iPad, select an iPad from under the Device list on the left side of the screen. Click on the Update button in the middle of the screen. Follow the prompts to complete the update. Updating time will vary depending on the size of the update from Apple. When one unit is complete, the next unit can be selected until all units have been updated.

User Safety

Warning

This trolley must only be used for its intended purpose in accordance with these operating instructions. Failure to observe the following instructions can result in fire, injury, death by electric shock or equipment damage.

ELECTRIC SHOCK
Operate Carefully

- . Always turn OFF the power to the trolley before plugging IN or OUT.
- . Make sure each device is turned OFF before plugging into the trolley.
- . Do not unplug this trolley from the outlet when your hands are wet.
- . Do not use cables that are damaged.
- . Do not unplug by pulling on the cable.
- . Do not plug the cable into an extension cable.
- . Keep the door closed and locked when in use.
- . Disconnect the power cable from the wall before opening the doors.
- . Before moving this trolley from one room to the next, wrap the power cable around the winder located on the rear side of the trolley.

- . The product can only be used in schools, offices or other similar places.
- . This trolley is not designed to be operated by a child or student.
- . Only move this trolley under Adult operation.
- . Do not allow anyone to sit, stand, or climb on the trolley.
- . Move the trolley slowly.
- . Keep the caster locked when the trolley is not in transit.
- . Keep the trolley away from water.
- . Keep the ventilation holes unblocked for air circulation.
- . Do not block the ventilation holes when charging.
- . Do not pull the trolley. Push the trolley using the ergonomic handles to prevent muscle strain.
- . Do not use TV or monitor on top of trolley.
- . Do not use the trolley to store liquids or cleaning supplies.
- . Keep the door closed and locked when in use.
- . Disconnect the power cable from the wall before doors opening.
